

# NFT MP Documentation

## Introduction

This document outlines the graphic design draft for the NFT MP. The design aims to capture the essence of the NFT Marketplace while providing a user-friendly experience.

## Page Designs

In our design, we have focused on minimalism. It is made in light colors, and all attention is focused on the NFT cards, as they are very bright and contrasting.

Website would include a designated topbar with access to every page, apart from the error page.

- Home Page
  - Starting section with NFT graphics and a clear call-to-action.
  - FAQ section to build trust.
- Products Page
  - Grid layout showcasing NFTs and galleries.
  - Filter options and search bar for easy NFT searching.
  - Easy transactions powered by MetaMask
- Collection Page
  - Clean layout displaying blog posts with thumbnails and summaries.
  - Categories for efficient content browsing.
- Error Page
  - Message "Oops! Something seems to have gone wrong." with a fun illustration that acknowledges the error will guide the user back to the main site.

## Design Mockup

Here is the link for our design:
